

***2005-2009 State of Wisconsin Consolidated Plan Initiative
Information Gathering Roundtable Locations***

This 5-year expenditure plan for housing, community, and economic development projects provides over \$50 million annually through state and federally funded programs. Developing the Plan is designed to be a collaborative process where all levels of government, public and private agencies, private industry, and citizens participate in crafting a comprehensive approach to addressing affordable housing and local development needs. Seven information gathering roundtables will be held throughout the State in June. These sessions will give you a chance to identify where resources and priorities should be directed to meet local housing, community and economic development needs.
